Confidential report on Luman S. Drown's
Coin Collection

Has a few thousand coins chiefly cents.
Takes pride in the fact that he has picked
up nearly all of his coins and has bought
next to nothing. Consequently junk.

Has very few silver coins, most every
thing copper. Has quite a number
Greek & Roman nearly all poor,
mostly copper some castings and electros
of which he seems to be ignorant of.
No metapontum.
